# GRUNDEX MUD PUMP

## COMPRESSED AIR-POWERED WATER AND MUD PUMP

for quickly extracting water from construction pits. The simple GRUNDEX water and mud pump can be used quickly and easily – without electricity or a pump unit – to keep construction pits free of groundwater, mud and rainwater.

It is operated using compressed air from the compressor on site. The compressor hose is connected to the Mody coupling on the GRUNDEX pump.

Water and mud are sucked up and transported out of the construction pit either directly or via a connectable spiral hose. The spiral hose can easily be connected to the GRUNDEX pump using the C-hose coupling.

This inexpensive pump is completely wear-free and a useful addition to any civil engineering project.

**GRU 200 1032** GRUNDEX Pump  
**GRU 200 1033** 3 m 2" spiral hose with C-hose coupling

## TECHNICAL DATA

Air flow (at 6 - 7 bar)	2,5 m <sup>3</sup> /min
Maximum flow rate	30 l/min
Weight	3,6 kg
Hose length	3 m

Spiral conveyor hose
