GRUNDODRILL  
18ACS / 18N  
ROCK DRILLING HDD RIG  
KING OF ROCK

**ADVANCED TRENCHLESS TECHNOLOGY**

# GRUNDODRILL 18ACS / 18N

## MAKES AN IMPACT IN ALL SOILS

### Ideal power ratio

Drive carriages with "rack and pinion":

- Stepless adjustment of torque and speed for maximum rotational power and maximum productivity at any speed\*
- Best possible adaptation to demands and soil conditions

### Lightning-fast rod exchange

- Fully automatic operation ensures minimal downtime, maximum productivity and relief for the machine operator
- The on-board crane facilitates easy handling of the rods, stacking boxes and additional components
- Rotation of drill rods within rod box possible during normal operation, which results in consistent use and consistent wear of the rods

### Rods for every purpose

- Rods TD73 and TD82 for jet drilling
- Elicon 80 and Elicon 95 twin tube rods for rock drilling\*
- Quick conversion from fluid-assisted to rock drilling\*

### Cable-guided drilling

- The GRUNDODRILL 18ACS and the GRUNDODRILL 18N can optionally be converted for cable-guided bores when drilling in challenging terrain and at great depths
- Cable-guided drilling is also possible in connection with twin-tube rod system\*

\* only for GRUNDODRILL 18ACS

TRACTO.COM/  
APPLICATIONS

## APPLICATION

### INSTALLATION METHOD

### BORE DIAMETER

### MAIN APPLICATIONS

### SPECIAL APPLICATIONS

\* depending on soil conditions

## OVERVIEW

**01 Comfort cabin** hydraulically-adjustable and vibration, dampened, user-friendly, clear layout, can be positioned flexibly

**02 Large rod magazine** - up to 225 m of TD 73 jet drilling rods or 210 m of ELICON 80 rock drilling rods on board

**03 Anchoring system** for enhanced stability while drilling

**04 Hydraulic loading crane** for self-sufficient handling of optional stacking boxes, drilling rods and attachments

**05 Bentonite collecting tray** - optionally with Bentonite suction pump

**06 Two stabilisers** - maximum stability, variable inclination of the cradle for an ideal penetration angle

**07 Broad undercarriage** - with rubberised steel tracks – extremely mobile and self-supporting

**08 High performance bentonite pump** - for rapid reaming speed and large reaming diameters

**09 Diesel engine with the highest output of its class** – low fuel consumption, low noise and emission levels

**10 Large GRP hood** - easily accessible for service and maintenance

# GROUND CONTROL – MAXIMAL OPERATOR COMFORT

## 1 | Total ease of use

Two multi-function joysticks for all functions in bore and driving mode. Different operating modes, which can be freely selected by the machine operator:

Manual mode:

- All machine functions controlled by the machine operator

Semi-automatic mode:

- Memory functions for rotation and thrust
- Automatic paddle mode
- Automatic rod exchange mode
- Automatic reloading for rod magazine

Fully automatic mode:

- incl. automatic drilling, automatic rod exchange\*, rod lubrication and cleaning, etc.

Service mode:

- Complete diagnosis of drilling system via integrated display
- Complete parameter setting/adjustment of bore rig via integrated display

## 2 | Top notch workplace

- Panel PC with touchscreen and internet access
- High-resolution colour screen
- Language selection
- Automatic drill data log according to DVGW standards
- Remote diagnosis with telemetric data transfer
- LED lighting
- Radio with Bluetooth hands-free system, CD drive and USB port

## 3 | Customised ergonomics

- Grammer comfort seat XL
- Air suspension with automatic weight adjustment
- Can be adjusted individually
- Seat heater
- Fabric upholstery
- Panorama glazing for optimum overview
- Stepless hydraulically swivelling cabin. If required, work can also be carried out with the cabin in transport position, e.g. in confined spaces
- Heating and air conditioning

\* only with TD73/TD82

# EFFICIENCY – METRE BY METRE

## **Full performance - economical from the first metre**

All GRUNDODRILL rigs are designed for a wide range of applications; a long service life, minimal wear, minimal downtime and low consumption of resources and fuels – making them particularly flexible and economic – from the first day onwards.

### **Elicon TWIN-Tube Rods \***

The inner tube is bedded inside the outer tube by means of wear elements. The inner tubes are simply, quickly and firmly connected using plug-and-twist connectors. The special design of the ELICON twin-tube system makes maximum fluid volumes possible even with long drilling bores.

\* only for GRUNDODRILL 18ACS

## VARIANTS

# GRUNDODRILL 18ACS / 18N TRAILBLAZER

### FEATURES | BENEFITS

- Cummins motor Stage V for driving and drilling, 123 kW
- Stepless adjustment of torque and rotational speed for maximum rotation and highest level of productivity at any speed \*
- Drill rig with rubber track undercarriage, stabilisers
- Wireless remote control
- Spacious cabin, comfortable seat, joysticks, panel PC with touchscreen, air conditioning
- Automatic bore mode

- Fully automatic rod exchange system \*\*
- Fully automatic clamp and break-away facility
- Anchoring system with drilling fluid collecting tray
- Powerful HP Bentonite pump on board the rig
- Bore data logging – data transfer
- High-pressure cleaner
- Optionally with drill rod type TD73 or TD82

\* only for GRUNDODRILL 18ACS

\*\* only with TD73/TD82

## WELL EQUIPPED IS HALF WAY THERE

Drilling tools, perfectly adapted to the bore rig, guarantee optimal drilling progress through every type of soil. Robustness and durability of all parts are assured.

### STANDARD DRILLING

Sonde housing with bore head

Medium Soil Reamer

Cone Reamer

GRUNDOREAM

### ROCK DRILLING

Rock drilling unit with roller chisel

Hard Soil Reamer

Hard Soil Rockreamer

Holeopener

## MIXING SYSTEMS

A first-class drilling fluid technique is an important component for successful drilling. In combination with the BORE rig and drilling tools, the drilling fluid technique of TT provides a coherent package for an efficient job completion – even in complex and alternating soils.

Powerful mixing systems and pumps guarantee high drilling fluid performance. Professional measuring units and drilling fluid additives are available to ensure a drilling fluid quality, which is well adapted to the soil.

Learn more about this topic in our in-house training courses or ask us for additional information on mixing systems and truck platforms.

## TRANSPORT

We are happy to provide assistance with the configuration and choice of your truck including trailer. For details, please contact your local sales representative.

# FULL SERVICE FOR TRENCHLESS TECHNOLOGY

Whether its before, during or after the purchase, whether in person or online – we are always at your side with advice and support. Our wide-ranged service is specially tailored to the requirements of trenchless pipe installations, so you can concentrate fully on your core business.

## Digital Solutions

Our website offers you the whole world of trenchless technology in digital form. Find out more about our company, our products and their applications. Discover the digital tools for the HDD drilling technology and many other intelligent solutions. Always stay up to date by using the links to our social media channels. Or you can order machines, accessories and spare parts in our eSHOP – easy and conveniently via PC, smartphone or tablet.

## Nodig Product Specialists

You can truly rely on our product specialists for all technical questions regarding the function and application of our steerable and non-steerable NODIG-systems. With comprehensive knowledge in each of their special fields, you can be sure they will find the best solution for your trenchless projects and advise you competently on setting up your jobsite.

## Financing

We offer attractive financing solutions for new and used machines to our customers and sales partners through the TRACTO-TECHNIK Finance GmbH. Be it financing, hire purchase, various types of leasing or insurance: we provide extensive expert advice, individually and personally, in order to find the tailored solution for you. Discretion goes without saying.

## Training

Qualified training enables you to apply trenchless technology even more effectively and profitably. Our wide range of training courses for machine operators, construction professionals as well as planners and clients cover all aspects of NODIG technology, including special topics. Certified trainers also instruct you, in theory and practice according to your individual requirements, either at one of our numerous company locations, or directly on your own premises or online, independent of time and place.

## Specialised Civil Engineering Service (Application Technology)

The specialised civil engineering service for application technology provides support for all your trenchless construction sites. Our experts demonstrate the steerable and non-steerable NODIG technology live in practical use, show your drilling teams how to use it or actively assist with special projects.

## Geoservice

Precise knowledge of the soil is the key to successful trenchless projects. Our Geoservice team provides you with this professional knowledge. Our expertise puts you in a position to master every type of soil. Based on geoscientific maps and existing construction files, we supply information on the soil, which will help you with calculations or supplements.

## Used Equipment

If you want to sell a used machine at an attractive price or are looking for the right equipment for your tasks, our full service for used NODIG machines will take the workload off your hands – from appraisal and price determination to professional repair and certification, through to achieving the best price for you via our used machine website with access to one of the world's largest construction machinery platforms.

## After Sales

Via our worldwide service network we are always there for you, even after the purchase. A total of five TRACTO plants and seven customer centres in Germany, as well as our worldwide sister companies and sales partners guarantee fast supply of spare parts and immediate availability. Our competent service staff offer fast assistance, to ensure you don't lose any time.
