# APPLICATION TECHNOLOGY

SPECIAL-CIVIL ENGINEERING-SERVICE

## ADVICE & SUPPORT FOR YOUR JOBSITES

Our team of application experts will support your trenchless technology project. We can demonstrate our equipment live on site, instruct your drilling crews in the correct use of our machines, and provide expertise on particularly challenging NODIG projects. Our extensive park of demonstration machines allows us to showcase our broad range of steerable and non-steerable trenchless techniques, alongside relevant tools and accessories.

### THE SERVICE INCLUDES

- Demonstration of all systems for pipe installations and renewals: GRUNDOMAT soil displacement hammers, GRUNDORAM pipe rammers, GRUNDOPIT and GRUNDODRILL HDD bore rigs including mixing systems, as well as GRUNDOBURST and GRUNDOCRACK pipe bursting systems
- Instruction of your team in the application of the above mentioned NODIG systems within the scope of training courses or project-related on site
- Rental of soil displacement hammers, pipe rammers, and also dynamic and static pipe bursting systems from an extensive machine park
- Technical and personnel support for your special projects
- Ten vastly experienced experts available for assignments at home and abroad

# GEOSERVICE

PROFESSIONAL UNDERGROUND  
KNOWLEDGE

## GEO-EXPERTISE FOR YOUR BORE TASKS

In order to carry out a trenchless bore successfully, it is important to know the underground soil conditions you are going to face beforehand. Very often projects fail because information regarding the underground soil has not been checked. This professional knowledge is provided to you by our Geoservice team. Focussing on HDD-bores up to machine classification 300 kN, our expertise puts you in a position to master all soil conditions.

### THE SERVICE INCLUDES

- Assessment of the soil conditions using geoscientific maps and publicly available information
- Review of construction files relating to your project to identify the most important aspects and recommendations – helping you to understand complex issues
- Site visits to assess the geological-geotechnical conditions of your project on site
- Summary of all available information in short geotechnical statements for calculation purposes or supplementary negotiations
- Trainings, seminars and webinars provide information about geotechnical aspects of HDD projects and put you in a position to use the soil information to good effect in practice

# TRENCHLESS DEVELOPMENT

SPEAKING UP FOR OUR INDUSTRY

## ONE VOICE FOR THE INDUSTRY

In order to develop the market for trenchless constructions even further, the experts from Trenchless Development specifically educate the public and decision-makers in civil engineering about the advantages of the NODIG technology. Their measures are primarily aimed at network operators, utility companies, planners, municipalities and associations.

### THE SERVICE INCLUDES

- Free lectures/webinars on the use of trenchless technology for current areas of application
- Tender specifications for trenchless installation and renewal methods
- Studies and specialist information on the NODIG benefits
- Individual advice
- Active participation in associations

# NODIG- PRODUCT- SPECIALISTS

TECHNICAL SUPPORT

## KNOW-HOW SUPPORTING YOUR PROJECTS

You can count on our product specialists for all technical questions regarding the machine technology and jobsite set-up. With comprehensive knowledge in each of their specific fields from years of practical experience, they will find the best solution for your trenchless projects.

### THE SERVICE INCLUDES

- Answers to technical questions on the function and application of the NODIG technology for steerable/non-steerable pipe installations and pipe renewals including accessories
- Advice on your jobsite project and the selection of suitable equipment

# USED MACHINES

CERTIFIED QUALITY

## FULL-SERVICE FOR YOUR EQUIPMENT

If you want to sell a used machine at a fair price or are looking for the appropriate machine for your tasks, our Full-Service for used NODIG-machines takes care of everything for you – from the appraisal and price determination to the repair and sale in the web shop. Digital tools optimally bring supply and demand together.

### THE SERVICE INCLUDES

- Trade-in or outright purchase of own-brand or competitive equipment
- Fast and transparent evaluation of used equipment on site
- Inspection and expert refurbishment of TRACTO equipment to 'Certified Used Equipment' level
- Online sales via one of the world's largest construction machinery platforms
- Manufacturer warranty for 'Certified Used Equipment' from 6 months up to 2 years

# FINANCE

## FINANCING SOLUTIONS

## TAILOR-MADE SOLUTIONS FOR YOUR OPERATION

Manufacturer financing allows you to react flexibly to seasonal or economic fluctuations without limiting your financial leeway, while securing your investment as far as possible during the contract period. The various financing models offered by TRACTO Finance GmbH are individually tailored to meet your demands, so that you always have exactly the right equipment available, in order to carry out your tasks.

### THE SERVICE INCLUDES

- Individual financing solutions for new and used own-brand equipment, including accessories and supplementary equipment
- Financial products, including various forms of Leasing and other forms of loans at competitive rates
- Gap insurance products to protect any value differentials at settlement, e.g. due to theft or write-off
- Swift acceptance process, generally without requesting further securities
- Competent professional advice with assured discretion

# TRAINING

## TRAINING IN THEORY & PRACTICE

## KNOWLEDGE FOR YOUR SUCCESS

Qualified training in theory and practice enables you as a user to apply the trenchless technology even more effectively and therefore more profitably. Our range of training courses for beginners and advanced users covers all aspects of the NODIG technology, including special topics. If you, as a user, are interested in a specific topic, we can also conduct training according to your individual requirements.

Regardless of time and place, we take care of everything required for a successful training course and are also happy to organise events, such as in-house exhibitions or product presentations, for you.

### THE SERVICE INCLUDES

- Professional training for users and service engineers, specialists and managers, as well as planners and customers
- Planning, organising and conducting training at our company locations, at your site or online
- Organisation and hosting of events on your behalf
- Certified technical trainers from the fields of sales, application technology and product consultation
